

We are excited to introduce a free mobile app that puts control of your debit card right at your fingertips! With CardValet®, you are able to:

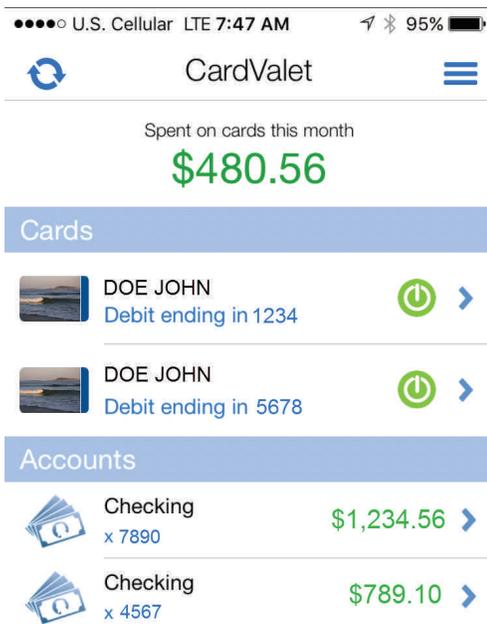

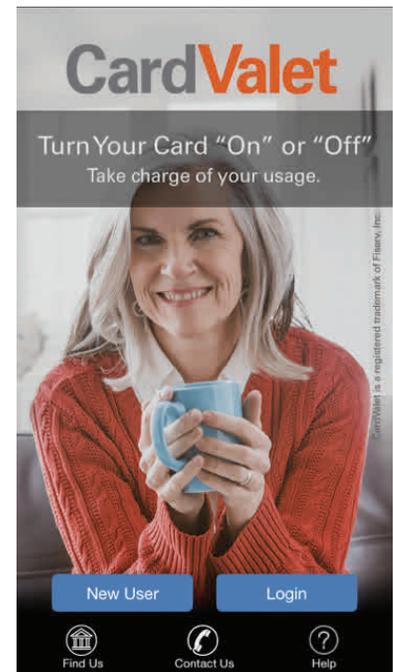

- Turn your debit card on or off right from your smartphone
- Receive interactive alerts to help you monitor transactions made with your debit card
- Control how, when and where cards are used
- Prevent, detect and report unauthorized use of your debit card
- Set spending limits on your card*

The app is free and can be downloaded from the App Store or Google Play (CardValet® is not currently supported by Windows phones at this time).

- To install the app, visit your phone's app store and type in "CardValet®" in the search box.
- Click the button to download the app and enter your app store credentials.

Once the app has downloaded, launch the app and click the blue "New User" button.

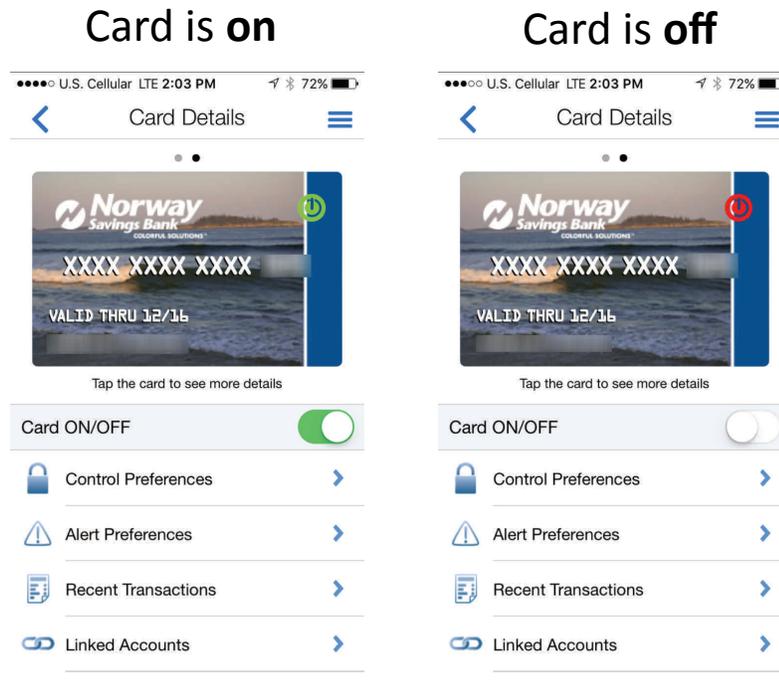

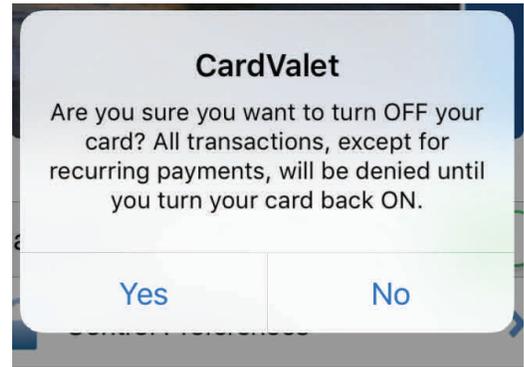

On the Card Verification screen, enter your debit card number to begin registration. Once your debit card number has been verified, enter the card's security code, expiration date and billing address. You will also need to enter the last 4 digits of your social security number and will be asked to accept the CardValet® Terms and Conditions. Once all of this information has been entered successfully, you will be able to choose a username and password for your CardValet® account. The app features secure registration and authentication so you can rest assured that your information is safe.

After logging in, you can view your registered debit cards, account balances and the total amount spent on your cards each month right from the Accounts screen.

To turn your card off or view other card control options, simply click on the green button beside your debit card information.

If you choose to turn your card off, click on the green toggle switch beside the words “Card ON/OFF”. A confirmation message will appear when you turn your card off to notify you that all transactions, except recurring payments, with your debit card will be denied until you turn your card back on.

From the Card Details screen, you can adjust the settings on your debit card.

- Select locations where you want to allow in-store purchases with your debit card
- Select merchant types where you would like to allow or deny in-store purchases with your debit card
- Set up notifications that will be sent to you each time your debit card is used
- View a list of your recent debit card transactions
- Set a threshold policy that denies debit card transactions above a specified amount
- View linked accounts

**Please note CardValet® settings do not override the security settings and dollar limits put in place by the bank, including the list of restricted countries, especially when travelling outside of your normal location.*

To log out of CardValet®, click the menu icon  at the top right corner of the screen and select “Log Out”.

If you have any questions or need assistance with CardValet®, please contact Customer Care at 1.888.725.2207 Monday—Friday, 8 a.m. to 5 p.m. and Saturday, 8:30 a.m. to 12 p.m.
